

### **Preliminary 2024 League File #3**

MarkB, Saturday 20 April 2024 - 17:25:12

Sorry to do this to you, but the durability issue was not resolved when I did the second preliminary file. I was assured it is this time. So hopefully #3 is the charm.

For the three members who downloaded the #2 version, please download #3 and extract it to your league folder like it was a week file during the regular season.

#3 is posted in the League Files section of the website.

For the rest of you:

In the game go to Utilities>New Draft League. Title it whatever you want. Could be 2024 KRFL or 2024 KRFL Prelim Ratings, or whatever.

Close the game.

Down load the league file.

Extract it into the folder you created above just as you would any weekly file during the season.

Reopen the game and set that folder you created as the active folder.
